WORK EXPERIENCE

SplitOff Pty Ltd **Nov. 2020 – Feb. 2021**
Front-End Developer *Sydney, NSW*

- Programmed in Svelte JS Framework, HTML5/CSS, JavaScript, and PostgreSQL.
- Contributed to multiple live Git projects.
- Added new features to the front-end of a shopping cart payment system, such as new text areas, new windows.
- Implemented designers' sketches/prototypes to the front-end.
- Created a documentation website for the organization.
- Implemented shopping cart front-end to the server back-end communication.
- Configured the shopping cart payment system to work on clients' websites with API.
- Created JSON config files which control how the shopping cart is displayed and where.
- Used Node Package Manager.
- Analyzed web socket requests sent from the shopping cart.
- Made sure the front-end works flawlessly with the back-end by performing extensive UAT testing.

NOTABLE PROJECTS

- **chess-with-ai:** C# chess application with all chess rules built-in, a competent chess AI, and a responsive GUI. User can play against the computer or against another human player.
- **order-management-system-wpf:** C# order management system, which includes 3rd party login authentication for extra security. Allows the administrator to place orders, change order status, check whether the order can be fulfilled, and cancel existing orders. The application then reflects those changes onto SQL database.
- **payroll-csv-calculator:** C# application takes in a .csv file that contains information about employees. Afterwards, the application creates a new .csv file that contains the gross & net pays, the tax to be paid (different taxes correspond to different visa types and different tax brackets). Could be useful for accountants.

EDUCATION

TAFE NSW **2021**
Diploma of Software Development *Sydney, NSW*

TAFE NSW **2020**
Certificate IV in Programming *Sydney, NSW*

Arthur Phillip HS **2019**
High School Certificate *Sydney, NSW*
